Investment Framework

A discipline process to identify and invest in high quality businesses with durable growth and attractive risk-adjusted return

We don't Invest in more companies, We invest in Right companies.

Quality Businesses.Visible Growth.Strong Finances.Attractive Valuations

Our Investment Process

A disciplined, repeatable process to identify, evaluate and invest in high-quality compounders.

We follow a rigorous process, but stay flexible thinkers

Discipline in process. Freedom in thinking. Focus on outcomes.

Investee company 1: Sanghvi Movers

Rishi C Sanghvi
Managing Director

Thesis

We foresee strong earnings growth driven by the Wind EPC segment alongside P/E rerating. Both these elements have started to play out, hence this stock has been moved to Hold status from Buy status.

Triggers identified

The company's exceptionally large wind EPC orderbook signals a clear and rapid business transformation from equipment rental to renewable energy.

Sector re-rating potential is emerging, as investor interest shifts toward companies with significant renewable exposure and large-scale project execution capabilities, which might drive higher valuations and sustained future growth. The expansion into Saudi Arabia is an added trigger.

What's Playing Out

Sanghvi Movers, once valued mainly as an equipment rental firm, is undergoing a pronounced business transition. The market has responded, sharply increasing its stock price in the last three months.

The burgeoning renewables business is now more visible to investors, prompting recognition of the company's changing profile and a corresponding re-rating. Holding, not buying more.

Success story: Force Motors

Prasan Firodia
Managing Director

Thesis

We initiated a position in Force Motors following their ₹300 crore joint venture with Rolls-Royce Power Systems in March 2018, where the entire MTU Series 1600 engine manufacturing line would be relocated from Germany to their Chakan facility near Pune. This strategic partnership represented a ₹1,000 crore revenue opportunity and positioned Force Motors as the exclusive global manufacturing hub for these high-powered engines (545-1050 HP) used in power generation and rail applications. Additionally, they maintained a virtual monopoly in the Indian passenger vehicle segment through their Traveller range, which dominated the 9-26 seater market.

What played out

Despite significant COVID delays in Rolls-Royce JV implementation and initial project setbacks that tested our patience, Force Motors ultimately delivered exceptional results:

BMW partnership achieved 100,000 engines milestone, revenue surged 149% from ₹3,240cr to ₹8,072cr,

company transformed from losses to highly profitable with ₹800cr+ net profit,

secured valuable defense contracts, Traveller maintained market dominance,

validating our patient long-term investment thesis.

How we exited

We staggered the exits. It was around a year back we started exiting this stock. The average realisation was ~400%.

Success story: Sejal Glass

AMRUT S. GADA

Promoter and Founder

Thesis

New trusted promoter, significantly underperforming capacity that if directed well would grow the revenue multifold, improving margins given the foray into value added glass. All this supported by a booming UAE real estate market.

What played out

The RAK unit which was acquired started to yield optimum results.

From doing a topline of 9 Crores from the RAK unit in FY2023 to INR 150 Crores in FY2025.

Secondly, the company PAT turned positive after several years and they are using up their DTA.

Seeing this turnaround and the fundamental strength, large Indian funds like Abakkus have entered.

Where is it heading

Eventhough we have started to take small exits, we are positive. The new acquisition of Glasstech will result in spike in revenues, overall earnings growth and a stronger portfolio. Our entry price was near 200 levels and current price is 800.

Failed story: Unnamed

Unnamed

Managing
Director

Entry Thesis

COVID-19 drove pharma sector tailwinds while the company traded at attractive 9-10x PE despite being the #5 US generic player. Strong ₹24,775 crore revenues, China+1 supply chain opportunities, and complex generics pipeline offered growth potential, though USFDA regulatory issues needed resolution.

What went wrong

Later, in a Delhi-based scam, regulators arrested Reddy, a family member and director of the promoter group of the company. This triggered suspicion within our team. Upon further investigation, we uncovered some 15-year-old news items that mentioned the close relationship between the promoter family and leading politicians, including allegations of political favors received by them that were under investigation.

Since these news items were very old, our research team had failed to identify them during the initial due diligence. After this information came to our knowledge, our initial investment thesis and fundamental analysis changed significantly, prompting us to exit the stock at a heavy loss.

How we exited

We staggered the exits. There was plenty of liquidity at the time of our exit gladly. The average realisation was -30% in this stock.

PERFORMANCE - SPECIAL FUND

Special Fund
S&P BSE 500

Investment Objective: To generate long-term capital appreciation through investment in listed equity and equity-related securities of companies listed on recognized stock exchanges in India, following a value and growth-oriented investment approach with participation across market capitalization segments and a predominant inclination towards mid-cap and small-cap businesses.

The investment approach seeks to identify scalable emerging businesses with strong fundamentals and long-term growth potential through a research-driven and bottom-up investment process.

PERFORMANCE - Dividend Yield

Investment Objective: To generate long-term capital appreciation along with income distribution potential through investment in listed equity and equity-related securities of companies exhibiting sustainable dividend yield characteristics, stable cash flows, and long-term growth potential, and listed on recognized stock exchanges in India.

The investment approach may maintain a higher allocation towards mid-cap and small-cap companies based on dividend yield opportunities, improving fundamentals, and valuation attractiveness identified through a research-driven and bottom-up investment process.

What Makes us Different?

1

Skin in the game

Substantial investment in the same companies. Promoters and employees portfolio is similar to those of PMS investors.

2

Communication

Monthly Fund manager letter, personal interaction with fund manager, and frequent Youtube Lives.

3

Green Sharks

Podcasts with promoters of listed entities. Giving retail investors a fresh insight.

4

Customisation

Portfolio tailored to customer requirements basis their risk and time horizon.

5

Seamless onboarding

Fully digital onboarding for residents. Approved by Nuvama.

6

Dedicated NRI Desk

Given the complexity behind NRI onboarding, we have set up a dedicated desk taking care of everything from onboarding to taxation.

Green Sharks

A deep dive with promoters of listed entities
