

GREEN PORTFOLIO

GREEN PORTFOLIO SPECIAL FUND – July 2025

GREEN PORTFOLIO SUPER 30 FUND – July 2025

FUND MANAGER'S NOTE

During the month ended 31st July 2025, our Green Portfolio Special Fund was Down by 1.41% and Super 30 Fund was Down by 2.17% while the benchmark (BSE 500 TRI) was Down by 2.71%

We are navigating an intriguing economic environment at present. Following a period of moderate performance in the preceding year, markets have entered a phase of expected volatility. That said, India continues to stand out as one of the fastest-growing large economies globally.

Our results this quarter have been mostly on the positive side, though not as strong as the solid performance delivered in Q4 FY25. Many of the underlying businesses are showcasing flat to mid-teen growth, largely influenced by cautious corporate sentiment following the newly announced tariffs by President Trump. At present, we are holding 12% in cash, up from near-zero levels in Q4, providing us with the flexibility to quickly deploy into attractive opportunities as market conditions turn more favourable. While this period represents consolidation rather than acceleration, it is an important time to position portfolios for the potential growth rebound we expect in the second half of the year.

We are midway through Season 6 of our Green Shark series, and the response on YouTube and across public forums continues to be overwhelming. These management interview segments remain dedicated to empowering public investors through education, with many more insightful episodes lined up in the month ahead.

FPI/FII flows will keep pouring in and reversing depending on Trump's policies. We cannot depend on surprise factors to conduct our fiduciary duty. All we can do as fund managers is allocate capital to the right companies: companies with strong fundamentals, excellent CG, and that are available at unreasonably low valuations.

We are seeing compelling opportunities in Private Markets (pre-IPO) and Private Placements of listed companies. With our AIF now launched, we can actively manage your funds in these segments.

DIVAM SHARMA
CEO & Co-Founder

CA DIVAM SHARMA
CEO & Co-Founder

With over 15 years of experience in managing investments in the stock market, he is an MBA from Indian School of Business, Hyderabad. Divam is a member of The Institute of Chartered Accountants of India. Divam has been the driving force of the company since its inception.

He is responsible for customer management, business development and has played a pivotal role in strategic decisions.

CA ANUJ JAIN
CIO & Co-Founder

Anuj functions as the research head and leads the investment committee. With 16 years of experience in stock market investing and financial consultancy, he brings aboard an extensive skillset.

He is a member of The Institute of Chartered Accountants of India, and a graduate from Delhi University.

Anuj Jain has been mentioned on international media and has delivered lectures on subjects of professional interest at various business forums.

OUR ACHIEVEMENTS

PERFORMANCE – SPECIAL FUND

Investment Mandate: Flexi-cap fund with a heavy inclination towards Small and Midcap companies with strong parentage and strong business fundamentals.

Will always be skewed towards small and midcaps as we foresee the highest growth in these segments.

ALLOCATION - Super 30

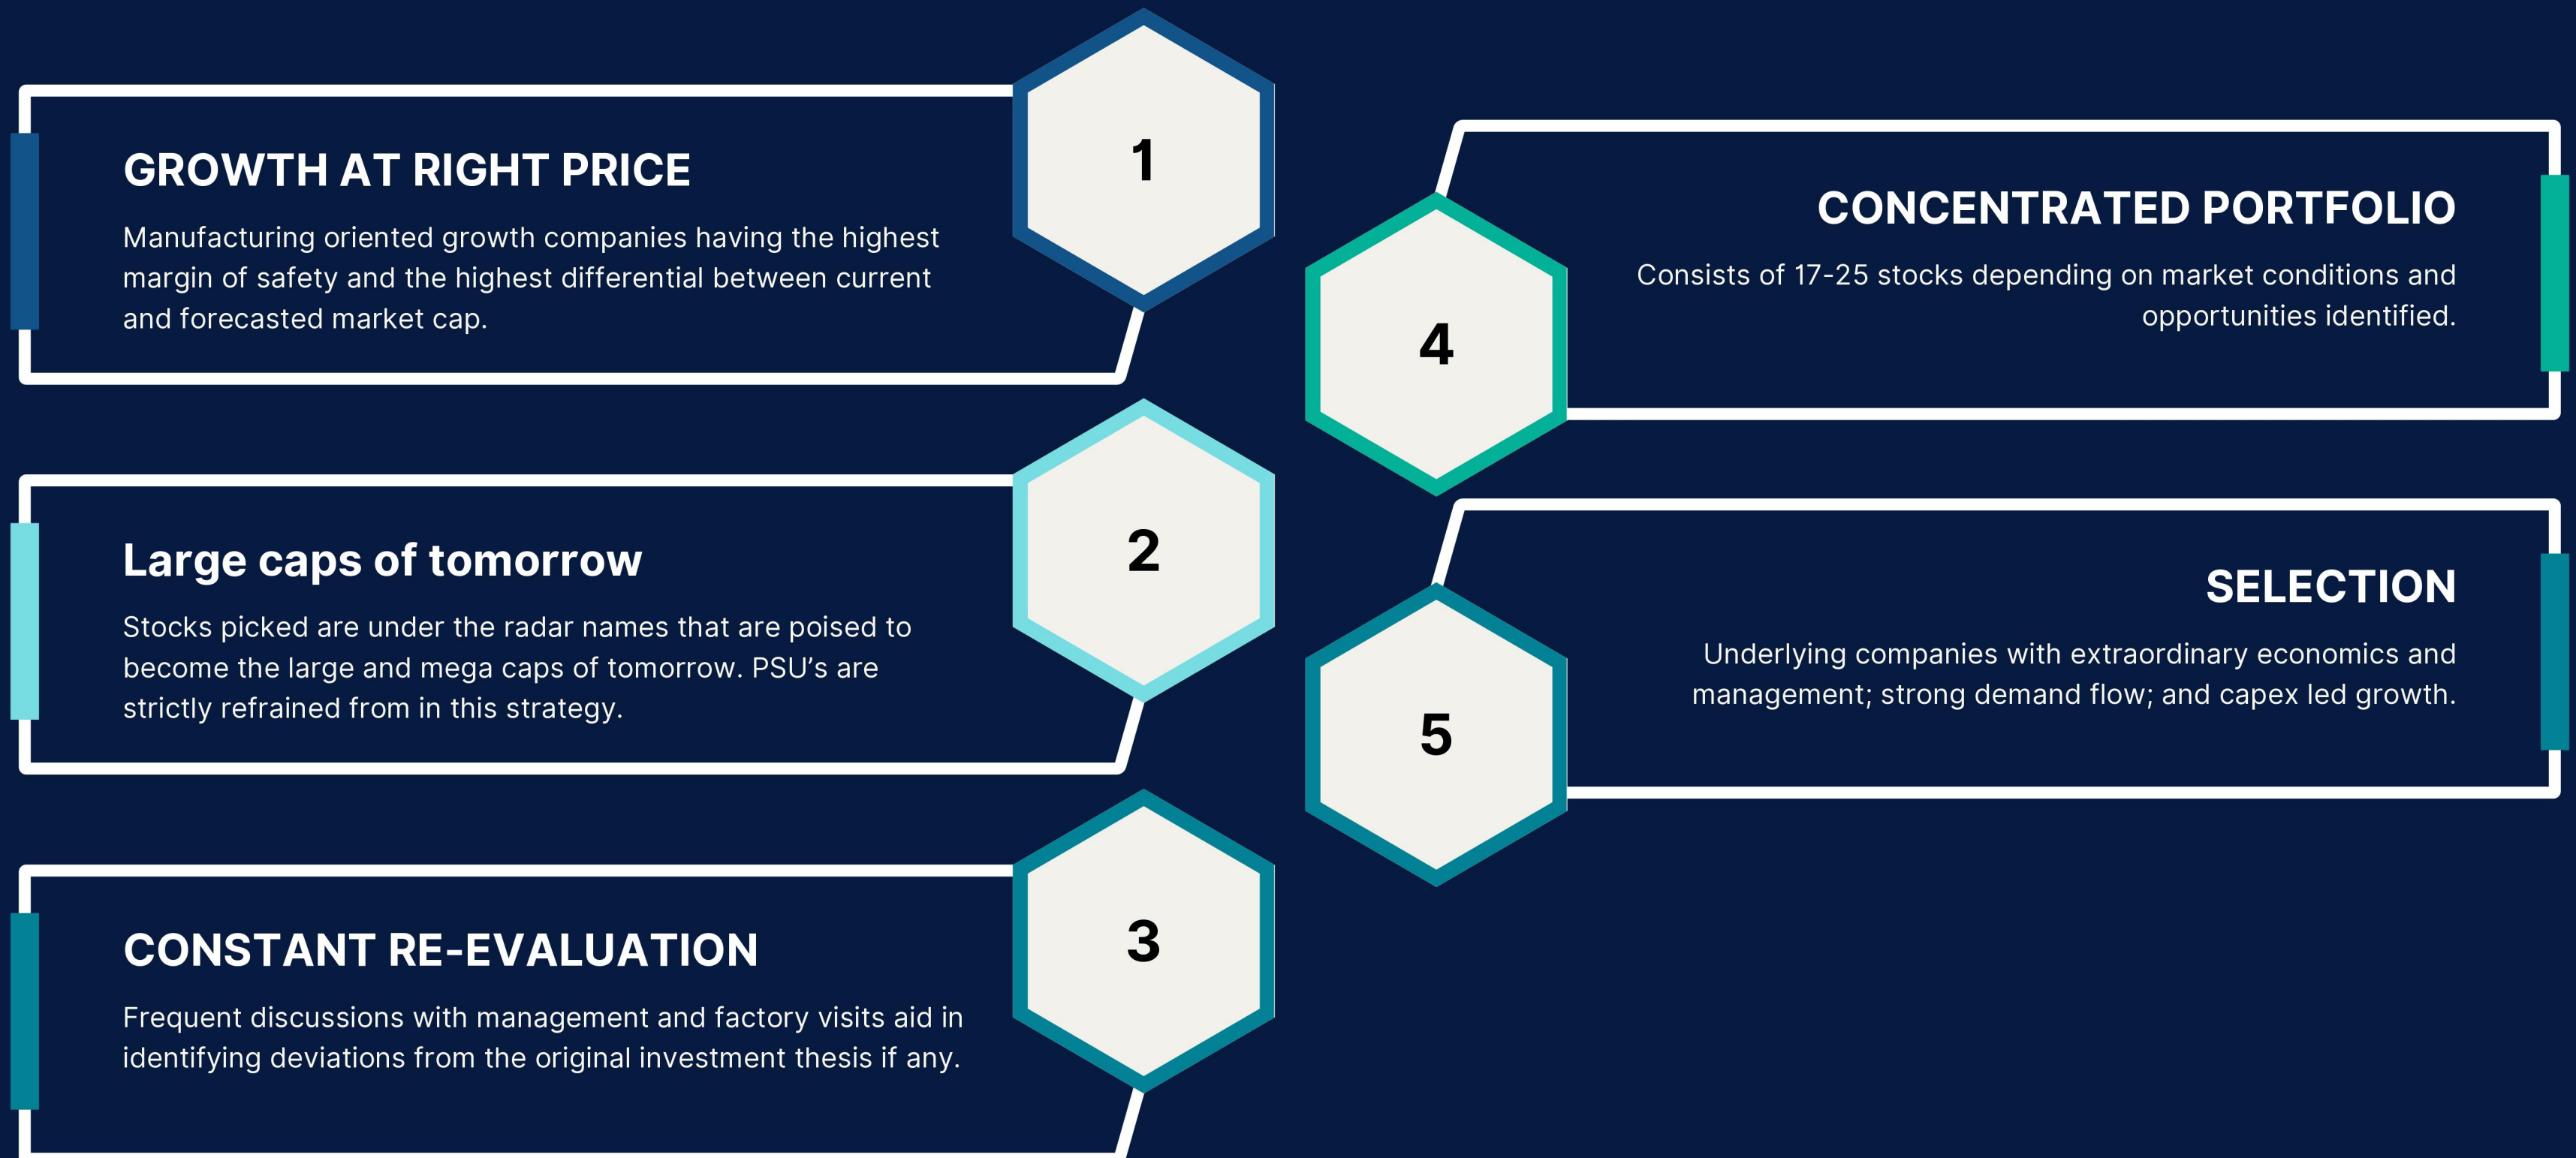

MARKET CAP ALLOCATION

TOP 5 SECTORS

Portfolio Construction

INVESTMENT PROCESS

MACRO FACTORS

Global sentiments; valuation; and sectoral tailwinds are thoroughly considered.

VALUATION

As traditional as it may sound, normalised price-to-earnings and cash flow based metrics must calibrate a 2-3x margin of safety.

FINANCIAL ANALYSIS

Debt levels, balance sheet strength and cash flow position must meet our screening metrics.

CORPORATE GOVERNANCE

Board structure, exorbitant related party transactions, promoter holdings, their history, and many other areas are considered.

This is our main focus when it comes to analysing companies.

BUSINESS MOAT

We prefer names who are leaders in niche industries and have an edge over their competitors.

EVALUATION

Through constant tracking, physical factory/facility visits, and management engagements, we yearn to constantly question our initial thesis, and make adjustments to our target price if needed.

SELL DISCIPLINE

We sell companies due to either of the following reasons:

- Target price range met for the stock
- The investment thesis played out before expected share appreciation, or
- Failure in investment thesis

DELIVERING IMPACT

Defense & Railways

DCX Systems Ltd

- The company is actively diversifying beyond defense into high-growth sectors like railway technology. The joint venture with Israel's ELTA Systems for an advanced railway obstacle detection solution opens new revenue streams, targeting Indian Railways' ₹34,000 crore tech-upgradation budget and international markets.
- Since PCBAs and integrated circuits form a major portion of raw material costs, their backward integration can significantly enhance margins in system integration.

FMCG

Srivari Spices

- Rapidly expanding beyond its core spices and atta business by entering the high-margin cold-pressed oil segment. The company is also strengthening its distribution network with modern trade partnerships (e.g., Big Basket, D-Mart) and expanding geographically into Karnataka and pan-India.
- With over 100% revenue growth in the last two years and management's confidence in maintaining a high growth trajectory, we predict, the company is well-positioned for scale.

Automobile Components

Steel Strips Wheels Ltd

- Expanding into alloy wheels and aluminum knuckle production, both of which have higher margins compared to traditional steel wheels. Alloy wheel penetration in the market has reached 41-42%, and SSWL is targeting a 50% growth in alloy wheel exports for FY25.
- Despite short-term export challenges, strong order backlogs, capacity expansion, and targeted entry into new international markets (tractor and AG OTR segments) support long-term growth.

Chemicals

Tatva Chintan Pharma Chem Ltd

- Company holds a dominant position globally in PTCs (Phase Transfer Catalysts) and SDAs (Structure Directing Agents), with a 12-15% market share in SDAs. It is also India's largest producer of electrolyte salts for supercapacitor batteries, positioning it well for future growth driven by EV adoption and emission norms like Euro-7.
- Upcoming launches in pharma and agro intermediates, along with the electrolyte salts segment's expansion, are expected to contribute ₹80-100 crore to revenue in FY26, with further scaling to ₹200-250 crore by FY27. This product pipeline is likely to support long-term growth despite near-term demand challenges.

FUNDAMENTAL FACTORS

TRIGGERS

- PLI Scheme
- Free Trade Agreements
- Supply Chain Diversification
- Strengthening Infrastructure
- Domestic Consumption
- Multiplier Effect

FINANCIAL PARAMETERS

- Return on Equity > 15%
- Effective tax rate ~ Statutory tax rate
- Operating Margins > 15%
- Debt/Equity < 1x
- Prudent Cash Flow management

ESG PARAMETERS

- Strong Corporate Governance
- Environmental Impact
- Related Party Transactions
- Succession Plan
- Diverse Board of Directors

FAQ's

Q) Describe portfolio management services?

Answer: Portfolio Management Services (PMS), service offered by the Portfolio Manager, is an investment portfolio in stocks, managed by a portfolio manager that can potentially be tailored to meet specific investment objectives. All decisions taken by us are documented and taken basis in depth research.

The following decisions are taken by the PM:

- Which stock to buy or sell
- When to buy or sell
- In what quantity or amount

When you invest in PMS, you own individual securities unlike a mutual fund investor, who owns units of the fund.

Q) How secure are my funds?

Answer: For any SEBI regulated PMS, they needs to deploy a custodian who takes care of funds. No amount is transferred to Green Portfolio's private bank account in any case.

For resident individuals:

-The funds are transferred to a pool account, and the funds are then segregated by the custodian in the client's name.

For NRI's or FPI's:

-We will have to open a bank account in your name, either NRE or NRO account. This bank account will be in your name. The power of attorney to operate this account will be given to the custodian.

FAQ's

Q) Why choose portfolio management services?

Answer: Portfolio management service provides you with professional management of your portfolio with adequate risk control and continuous monitoring done by our research team.

Q) There are 400+ PMS strategies, what makes you unique?

Answer: These are the following traits that make us stand out.

- 1) **Focus on Under-the-Radar Companies:** Specializing in lesser-known firms, with an average portfolio market capitalization of INR 12,000 Crores.
- 2) **Manufacturing-Oriented Fund:** Prioritizing investments in the manufacturing sector for robust and tangible growth opportunities.
- 3) **Minimal Exposure to Banking and IT:** Distinctly low to zero investment in banking and IT sectors, setting us apart from conventional index strategies.
- 4) **Ground-Level, Research-Driven Stock Selection:** Employing in-depth, on-the-ground research to drive our stock selection, ensuring informed and strategic investment choices.
- 5) **Discretionary Cash Holdings:** Adopting a cautious approach by holding liquid cash in client portfolios when suitable opportunities are scarce, emphasizing capital protection.

FAQ's

Q) Is it possible for NRIs to invest in portfolio management services?

Answer: Yes, an NRI can purchase shares of an Indian company on a stock exchange in India, under the portfolio investment scheme on a repatriation and/or non-repatriation basis. A PIO is considered as an NRI and hence all the benefits / conditions apply accordingly.

Q) What reports Portfolio Manager is expected to provide to the client?

Answer:

1) Factsheet (overall fund level): We furnish the clients with Factsheets on a monthly basis which shows the performance on an absolute as well as relative basis shows them the changes in the top five holdings as well as change in weightage of top five sectors in the fund.

2) Pitchbook (overall fund level): This consists of fund managers note. Along with the overall performance numbers for all funds, it gives an idea to investors about what the fund manager thinks about the previous month's performance and what he expects in the future.

3) Client Specific performance reports: This will be shared quarterly. Please note that performance data is available 24x7 through the client's custodian portal. Besides this, we send out performance reports on a quarterly basis.

FAQ's

Q) How often will I receive updates on the status of my PMS account?

Answer: The Client will receive a dashboard from where they can see the latest value and changes on a live basis.

Q) What are the rules that regulate a Portfolio Manager's services?

Answer: Portfolio Managers are regulated by the Securities and Exchange Board of India (Portfolio Managers) Regulations, 2020. You can read about the regulations [here](#).

Q) What are the tax implications of a PMS investment?

Answer: From a tax perspective, an investor pays tax just like any other equity investment. PMS is considered more tax friendly than an AIF. Compared to a mutual fund, since the stocks are held in your own demat, with gains and losses being recognized in your own name, you will be liable to pay income tax depending on the amount of gains and their nature. For instance, the following are the two natures of tax you would be liable to pay when you invest with a PMS.

Long term capital gains: If net gains for the year is greater than INR 1 Lakh, then the gains above that INR 1 Lakh is taxable at 12.5%.

For example, if an investor in PMS earns Long Term Capital Gains on equity shares of INR 50,000 it is tax free for the investor as the gain does not exceed the limit of one lakh rupees.

Short term capital gains: Taxable at 20%.

FAQ's

Q) What does a portfolio manager's capital adequacy entail?

Answer: Portfolio managers should have Rupees 5 Crores as net worth in the company in order to obtain the PMS license.

Q) What are your exit charges?

Answer: Zero. We have 3 different fee structures and in none of them do we charge an exit fee. Even if it's a partial withdrawal or a full withdrawal, there are no exit charges/fee/penalty or anything of that sort.

FUND ELEMENTS

Fund Name	Green Portfolio Special Fund
Investment Manager	Mr Divam Sharma & Mr Anuj Jain
Fund Description	Multicap, focused towards small and mid cap
Fees	Fixed only, Performance only, Hybrid
Investment Horizon	3-5 Years
Minimum Investment	INR 50,00,000
Custodians	Nuvama, ICICI, Orbis Financial
Auditor	Lodha and Associates

DISCLAIMER

INVESTMENT OBJECTIVE

- **SPECIAL FUND** The investment objective of the PMS business is to consistently grow our investor's wealth through disciplined selection and allocation of investment capital while ensuring protection from capital erosion. Over the years our Fund Managers have consistently compounded wealth by identifying and investing in Multi-Bagger stocks. This is a Growth at Reasonable Price strategy with utmost importance on corporate governance, growth prospects, industry dynamics, key company fundamentals, valuations and promoter integrity. We also emphasise the company's marketing strategy, R&D spend, product capabilities, competition, feedback from stakeholders. **Indicative tenure/Investment horizon: 3 years.**
- **SUPER 30** The objective of this fund is to provide a very high reward but with a higher than usual risk. The businesses chosen in this fund are turnarounds that lead to a spike in performance due to a special situation forming such as a change in key management, M&A, deleveraging etc. We aim to provide substantial gains in the medium to long term, with a minimum time horizon of three years. And throughout this investment period, we provide comprehensive research reports on a quarterly basis. **Indicative tenure/Investment horizon: 3 years.**
