# Investment Philosophy

## Screening Process

### Qualitative Elements

### Futuristic Elements

### Contemporary Quantitative Elements

#### Promoter's Involvement & History

- If a promoter has other business interests, especially in companies of a similar nature, does this raise a substantial conflict of interest?
- Any taint in the promoter's past that indicates issues with ethics or corporate governance is closely scrutinized.

#### Balance Sheet Quality

- A large proportion of assets dedicated to loans and advance to promoter related entities, unreasonable level of intangibles or goodwill, constant level of trade receivables from same customers are some of the areas in the balance sheet that undergo a close scrutiny during our research.

#### Other Area's

- Review from the business and investment fraternity.
- Market review of the company products.
- Background and capability of the auditor.
- Moat the company has in terms of distribution, economies of scale, brand recall, or trademarked IP's.

#### Financial Matters

- Visibility of > 25% growth is what we look for.
- Operating Margins > 15%. We prefer high margin businesses.
- Debt/Equity < 1x
- Prudent Cash Flow management with strong C.F from operations

#### Strategy & Approach

- Strong R&D pipeline
- Expansion and capex plans, and how that will shape the business
- For unlisted investments, the IPO timeline is key—we prefer companies aiming to go public within a year.
- Promoter should be keen on remaining completely engrossed in the business.

#### Cash Flow Strength

- Many a times, companies raise capital to meet working capital requirements.
- Ensuring we have a visibility of the medium-term future where the company is Operating Cash Flow positive is instrumental in these cases.
- We avoid circumstances where company is constantly operating cash flow negative while the revenues and earnings are growing.

#### Capital Structure

- Promoter stake and it's movement. Promoter holding of >60%.
- Below 1x debt/equity ratio.

#### Financials

- Operating margins >10% with visibility to grow north of 15%.
- We analyse how well the company has used capital.
- We prefer companies with >15% ROA.
- Existing growth in top-line and bottom-line.

#### Valuation & Ratios

- Favourable standing compared to peers in terms of valuation.
- Healthy balance sheet/cashflow/income statement ratios - especially debt, cash conversion, and capital productivity.
- Low valuation considering all aspects of the business.

# Investment Process

## Research, Research, Research

- Most ideas are generated by internal research analysts or from the industry connects we have a long term relationship with.
- Meeting company management, questioning on earnings call, and attending investor meetings.

## Bottom-up Focus

- We look for companies that are building something worthwhile which can generate sustainably growing revenue and earnings.
- Low debt to equity
- Good return on asset ratios
- High focus on promoter quality and financial statement rejigs if any
- Stocks that may be out of favor, overlooked or relatively unknown

## Investment committee

The three-member Investment Committee convenes virtually to debate the final investment thesis.

Each member shares their perspective, and the buy/sell decision is executed upon unanimous approval of the committee.

## Portfolio construction

- The concentration of the portfolio, market cap wise allocation, and overall risk/return characteristics of the portfolio is dependent upon the client's risk tolerance, income needs, and time horizon.
- Ideally an investor portfolio should consist of 17-25 stocks at any point in time.

## Risk Management

- We constantly monitor the progress of the companies, the promoter actions, and how they are allocating capital.
- A temporary slowdown in the industry or 2/3 bad quarters for a company do not perturb us from the initial thesis.
- We are non-challant regarding short term price performance of individual stocks but have zero tolerance for slippages in corporate governance.

# Investee company 1: Sanghvi Movers

**Rishi C Sanghvi**  
Managing Director

## Thesis

We foresee strong earnings growth driven by the Wind EPC segment alongside P/E rerating. Both these elements have started to play out, hence this stock has been moved to Hold status from Buy status.

## Triggers identified

The company's exceptionally large wind EPC orderbook signals a clear and rapid business transformation from equipment rental to renewable energy.

Sector re-rating potential is emerging, as investor interest shifts toward companies with significant renewable exposure and large-scale project execution capabilities, which might drive higher valuations and sustained future growth. The expansion into Saudi Arabia is an added trigger.

## What's Playing Out

Sanghvi Movers, once valued mainly as an equipment rental firm, is undergoing a pronounced business transition. The market has responded, sharply increasing its stock price in the last three months.

The burgeoning renewables business is now more visible to investors, prompting recognition of the company's changing profile and a corresponding re-rating. Holding, not buying more.

SANGHVI MOVERS LIMITED

# Investee company 2: OBSC Perfection

**Saksham Leekha**  
Managing Director

## Thesis

Started out making auto parts but now it's moving fast into defense, landing big customers like Tesla and Elbit. With huge orders and new opportunities, the company's future looks very promising.

## Triggers identified

OBSC Perfection is transitioning rapidly from automotive to defense and marine, leveraging precision engineering. New customer additions—Tesla (USA), Elbit (Israel)—signal global acceptance.

Large, multi-year defense order book, fresh export wins, and continued capacity expansion underpin management's targeted topline CAGR. Funds remain for CAPEX, supporting growth.

## What's Playing Out

Business mix is shifting toward defense with marquee client additions and its first export order in Israeli defense. Five facilities, rising machine utilization, and unutilized IPO funds support further expansion.

Defense, marine, and aerospace revenues are accelerating, with order book tripling versus last year. Margin expansion seen as new projects scale.

# Success story: Force Motors

**Prasan Firodia**  
Managing Director

## Thesis

We initiated a position in Force Motors following their ₹300 crore joint venture with Rolls-Royce Power Systems in March 2018, where the entire MTU Series 1600 engine manufacturing line would be relocated from Germany to their Chakan facility near Pune. This strategic partnership represented a ₹1,000 crore revenue opportunity and positioned Force Motors as the exclusive global manufacturing hub for these high-powered engines (545-1050 HP) used in power generation and rail applications. Additionally, they maintained a virtual monopoly in the Indian passenger vehicle segment through their Traveller range, which dominated the 9-26 seater market.

## What played out

Despite significant COVID delays in Rolls-Royce JV implementation and initial project setbacks that tested our patience, Force Motors ultimately delivered exceptional results:

BMW partnership achieved 100,000 engines milestone, revenue surged 149% from ₹3,240cr to ₹8,072cr,

company transformed from losses to highly profitable with ₹800cr+ net profit,

secured valuable defense contracts, Traveller maintained market dominance,

validating our patient long-term investment thesis.

## How we exited

We staggered the exits. It was around a year back we started exiting this stock. The average realisation was ~400%.

# Success story: Sejal Glass

**AMRUT S. GADA**

Promoter and Founder

## Thesis

New trusted promoter, significantly underperforming capacity that if directed well would grow the revenue multifold, improving margins given the foray into value added glass. All this supported by a booming UAE real estate market.

## What played out

The RAK unit which was acquired started to yield optimum results.

From doing a topline of 9 Crores from the RAK unit in FY2023 to INR 150 Crores in FY2025.

Secondly, the company PAT turned positive after several years and they are using up their DTA.

Seeing this turnaround and the fundamental strength, large Indian funds like Abakkus have entered.

## Where is it heading

Eventhough we have started to take small exits, we are positive. The new acquisition of Glasstech will result in spike in revenues, overall earnings growth and a stronger portfolio. Our entry price was near 200 levels and current price is 800.

# Failed story: Unnamed

## Unnamed

Managing  
Director

### Entry Thesis

COVID-19 drove pharma sector tailwinds while the company traded at attractive 9-10x PE despite being the #5 US generic player. Strong ₹24,775 crore revenues, China+1 supply chain opportunities, and complex generics pipeline offered growth potential, though USFDA regulatory issues needed resolution.

## What went wrong

Later, in a Delhi-based scam, regulators arrested Reddy, a family member and director of the promoter group of the company. This triggered suspicion within our team. Upon further investigation, we uncovered some 15-year-old news items that mentioned the close relationship between the promoter family and leading politicians, including allegations of political favors received by them that were under investigation.

Since these news items were very old, our research team had failed to identify them during the initial due diligence. After this information came to our knowledge, our initial investment thesis and fundamental analysis changed significantly, prompting us to exit the stock at a heavy loss.

## How we exited

We staggered the exits. There was plenty of liquidity at the time of our exit gladly. The average realisation was -30% in this stock.

# PERFORMANCE – SPECIAL FUND

**Investment Mandate:** Flexi-cap fund with a heavy inclination towards Small and Midcap companies with strong parentage and strong business fundamentals.

Will always be skewed towards small and midcaps as we foresee the highest growth in these segments.

# What Makes us Different?

## Skin in the game

Substantial investment in the same companies. Promoters and employees portfolio is similar to those of PMS investors.

## Communication

Monthly Fund manager letter, personal interaction with fund manager, and frequent Youtube Lives.

## Green Sharks

Podcasts with promoters of listed entities. Giving retail investors a fresh insight.

## Customisation

Portfolio tailored to customer requirements basis their risk and time horizon.

## Seamless onboarding

Fully digital onboarding for residents. Approved by Nuvama.

## Dedicated NRI Desk

Given the complexity behind NRI onboarding, we have set up a dedicated desk taking care of everything from onboarding to taxation.
